Week 10

Name: S Sabarish Roll No:2116240901090 Department: EEE 'B'

Q1)

Given a string, s, consisting of alphabets and digits, find the frequency of each digit in the

given string.

Input Format

The first line contains a string, num which is the given number.

Constraints

 $1 \le len(num) \le 1000$

All the elements of num are made of English alphabets and digits.

Output Format

Print ten space-separated integers in a single line denoting the frequency of each digit

from 0 to 9.

Sample Input 0 a1147205t6 Sample Output 0 0 2 1 0 1 1 1 1 0 0 Question 1

P Flag question

Given a string, s, consisting of alphabets and digits, find the frequency of each digit in the given string.

Input Format

The first line contains a string, *num* which is the given number.

Constraints

$1 \le len(num) \le 1000$

All the elements of num are made of English alphabets and digits.

Output Format

Print ten space-separated integers in a single line denoting the frequency of each digit from 0 to 9.

Sample Input 0

a11472o5t6

Sample Output 0

0210111100

```
1 #include <stdio.h>
2 #include <string.h>
 int main() {
char str[1001];
int freq[10] = {0}; // Initialize array to store frequencies of digits
              scanf("%s", str);
             for (int i = 0; i < strlen(str); i++) {
   if (str[i] >= '0' && str[i] <= '9') {
      int digit = str[i] - '0';
      freq[digit]++;</pre>

Passed all tests! ✓

Q2) Today, Monk went for a walk in a garden. There are many trees in the garden and each tree has an English alphabet on it. While Monk was walking, he noticed that all trees with vowels on it are not in good state. He decided to take care of them. So, he asked you to tell him the count of such trees in the garden.

Note: The following letters are vowels: 'A', 'E', 'I', 'O', 'U', 'a', 'e', 'i', 'o' and 'u'.

Input Format:

The first line consists of an integer T denoting the number of test cases.

Each test case consists of only one string, each character of string denoting the alphabet (may be lowercase or uppercase) on a tree in the garden.

Output Format:

For each test case, print the count in a new line.

Constraints:

 $1 \le T \le 10$

 $1 \le \text{length of string} \le 105$

Q3)Given a sentence, s, print each word of the sentence in a new line.

Input Format

The first and only line contains a sentence, s.

Constraints

 $1 \le len(s) \le 1000$

Output Format

Print each word of the sentence in a new line.

Sample Input

This is C

Sample Output

~	Learning C is fun	Learning C is fun	Learning C is fun	~

Q4) Input Format

You are given two strings, a and b, separated by a new line. Each string will consist of lower-case Latin characters ('a'-'z').

Output Format

In the first line print two space-separated integers, representing the length of a and b respectively.

In the second line print the string produced by concatenating a and b (a + b).

In the third line print two strings separated by a space, a' and b'. a' and b' are the same as a and b, respectively, except that their first characters are swapped.

Sample Input

Input Format

You are given two strings, **a** and **b**, separated by a new line. Each string will consist of lower case Latin characters ('a'-'z').

Output Format

In the first line print two space-separated integers, representing the length of \boldsymbol{a} and \boldsymbol{b} respectively.

In the second line print the string produced by concatenating \boldsymbol{a} and \boldsymbol{b} ($\boldsymbol{a}+\boldsymbol{b}$).

In the third line print two strings separated by a space, a^* and b^* . a^* and b^* are the same as a and b, respectively, except that their first characters are swapped.

Sample Input

abcd

ef

Sample Output

42

abcdef
